Business AutoCAD is primarily used by architects, engineers, drafters, surveyors, and other visual artists. AutoCAD is also used in manufacturing and construction. AutoCAD, combined with Microsoft Windows, is the de facto standard software used by North American architecture and engineering firms. AutoCAD can be a very expensive purchase and is not as widespread as rival programs, such as CorelDRAW. However, it remains the most widely used CAD software and the largest CAD market share in the world. AutoCAD

2016 is the first release in a decade to feature a new user interface. It was first released in early November 2014, with an early access program for a select number of people who signed up for the program. The release was a major update that featured the aforementioned new user interface, a refreshed user interface, improved performance, and many new features. AutoCAD is the most well-known of the two CAD packages, but it is not the only option. Although Autodesk offers a free version of AutoCAD, this is limited to the following: 2D drawing (schematic) functionality Graphical views of

drawings Basic block library (mostly text and dimensions) Print Preview
Dependent drawing views Protected
Import and export of the native AutoCAD.DWG format. AutoCAD Premium is a paid upgrade to AutoCAD that allows access to additional features such as: More AutoLISP (additional options and custom commands)
Enhanced annotation and notes

Revit is a BIM (building information modeling) software platform, which was developed by Autodesk's subsidiary Architecture, Autodesk and Macaulay, with help from the Structural Alliance for Innovation, InSite Architect, and the University of California, Berkeley. It is used for building information modeling, structural engineering, and structural analysis. In 2012, Autodesk released the Autodesk Design Review Suite, a "Design Collaboration" suite that allows design review and commenting during the review process and/or documentation, and is commonly used by those in the architecture and interior

design fields, and can be used in a number of other design professions. In 2012, Autodesk launched WebWorks Community and Forum, a subscription-based service that provides online support and tools for users. In 2012, Autodesk launched its new product line for architecture, engineering, and construction: Autodesk ULS (Unified Language System). It is a replacement for the proprietary, developer-only Unified Architecture Format (UAF) files. The goal is to replace all files created with UAF with ULS files. ULS files are intended a1d647c40b
