May 21, 2019 . TCL T453CY Dead Boot Fix Firmware File. Root . Features Android .Q: How can I make the Unity launcher transparant on XFCE? On Unity, I can enable the transparency of the unity launcher, so that it's background colour (and not its icons) is translucent. How can I enable the same effect on XFCE? A: This article describes a possible solution (2nd paragraph): The changes to this package are: * Xfce 4.8 (or later) is used and the panel clock uses the Xfce clockface theme * The 'clock' plugin in the panel is now loaded * They have added the Xfce 'clockface' theme This means that it's possible to do it using this already included plugin. Although I'm not using this, I was wondering if there is a straightforward way of doing it. But as this is included for Xfce, this should work with any version of Xfce (since the Xfce versions are included from the repos as well). If that's not the case for you, please let me know.
